

four77

SEA LEVEL (0ft)

AUTOMATIC

PACIFIC NORTHWEST

The four77 Sea Level is named for where this project begins: our entry-level exploration of custom watchmaking. Built around the familiar proportions and utility of a classic diver, it pairs a unidirectional timing bezel with the dependable NH35 automatic movement.

A white textured dial, luminous hands and indices, and a cut-to-fit rubber strap with butterfly clasp keep the design clean, practical, and ready for everyday wear.
